Saint Valentine's Day,

commonly shortened to **Valentine's Day**, is an annual commemoration held on February 14 celebrating love and affection between intimate companions. The day is named after one or more early Christian martyrs named Saint Valentine, and was established by Pope Gelasius I in 496 AD. It was deleted from the General Roman Calendar of saints in 1969 by Pope Paul VI. It is traditionally a day

on which lovers express their love for each other by presenting flowers, offering confectionery, and sending greeting cards (known as "valentines"). The day first became associated with romantic love in the circle of Geoffrey Chaucer in the High Middle Ages, when the tradition of courtly love flourished.

Modern Valentine's Day symbols include the heart-shaped outline, doves, and the figure of the winged Cupid.

Leap Year Facts

According to the Gregorian calendar, February is the second month of the year, and also the shortest month. February has 28 days until Julius Caesar gave it 29 days every four years. According to tradition, Augustus, the Roman emperor, took one day off to add one day to August, the month named after him. We now have February with 28 days, and 29 on leap years.
